

## **CEGESTI official member of Climate Technology Centre & Network (CTCN)**

Since August 2016, CEGESTI is official member of the Climate Technology Centre & Network (CTCN). This network will allow CEGESTI to share knowledge and take part in projects with other global working actors in mitigation and adaptation to climate change, thereby strengthening our efforts towards sustainable development in the region.

### **What is and what CTCN does?**

The CTCN promotes the accelerated transfer of environmentally sound technologies for low carbon and climate resilient development at the request of developing countries. We provide technology solutions, capacity building and advice on policy, legal and regulatory frameworks tailored to the needs of individual countries.

The Climate Technology Centre & Network facilitates the transfer of technologies through three core services:

- Providing technical assistance at the request of developing countries to accelerate the transfer of climate technologies;
- Creating access to information and knowledge on climate technologies.
- Fostering collaboration among climate technology stakeholders via the Centre's network of regional and sectoral experts from academia, the private sector, and public and research institutions.

Through these services, it aims to address barriers that hinder the development and transfer of climate technologies, and to thereby help create an enabling environment for:

- Reduced greenhouse gas emissions and climate vulnerability
- Improved local innovation capacities
- Increased investments in climate technology projects.

The United Nations Environment Programme (UNEP) hosts the CTCN in collaboration with the United Nations Industrial Development Organization (UNIDO) and the support of a consortium of partners that are engaged in activities related to climate technologies in over 150 countries.
